Edit, translate, proofread by me: TieuSa.

First, I'm Vietnamese. I can't read Japanese for you guys info. I translated this from my Vietnamese publish version. So, please don't say any bad things if it does not suit your tastes.

You're always welcome to do it by yourself.

The reason I do this because I've already read it up to volume 6 or 7 in my country long time ago. I think this is an amazing manga and hope that any translating group would grab it and translate it soon.

It means I wouldn't know how far I would go. My purpose is only present an interesting project to free scalation community online.

DON'T QUESTION ME! DON'T PUSH ME!
DON'T ASK ME TO JOIN YOUR GROUP!

If you cannot download from mangatraders where I will upload my files, you can visit cloversforus.wordpress.com (or cloverforus.wordpress.com, oh men! I don't have internet at home so cannot double check the 's' now >o<) for link mediafire. OK?

This chapter take me 3 weeks (about 10 hours to complete) since this is the first time I ever translate my language to English (I did translate from English to Vietnamese a lot though).

Enjoy!
